 Keys: A function key is a key on a computer or on the computer keyboard which can be programmed so as to cause an operating system program to perform certain actions. The function keys are arranged at the top of your keyboard numbered across from F1 to F12 and are commonly referred to as F keys or FN keys. The keys provide some
interesting shortcuts for common computer functions that can be useful tools in everyday computing. The keys are frequently used as the help key. Almost every program will open the help screen when this key is pressed. Windows Key + F1
would open the Microsoft Windows help and support centre. Opens the Task Pane. Note: The Windows key has the Microsoft flag logo on it and is located between the CTRL and ALT keys on the keyboard. F2 In Windows commonly used to rename a highlighted icon or file. Alt + Ctrl + F2 opens a new document in Microsoft Word. Ctrl + F2 displays
the print preview window in Microsoft Word. F3 Often opens a search feature for many programs including Microsoft Word from upper to lower case or a capital letter at the beginning of every word. F4 Opens find window. Repeat the last action performed - for Word 2000+ Alt + F4 will close the
open Window that you are currently working on. Ctrl + F4 will close the open window within the current active window in Microsoft Word. Starts a slideshow in
PowerPoint. F6 This key is often used to move the cursor to the Address bar Mozilla Firefox or Internet Explorer. Ctrl + Shift + F7 runs a Thesaurus check on the
word highlighted. Turns on Caret browsing in Mozilla Firefox. F8 The F8 key can be used to access Safe Mode if pressed during the computer's boot up process. F9 Opens the Measurements tool bar in Quark 5.0. F10 F10 is the key that is used to access Safe Mode if pressed during the computer's boot up process.
use the arrow keys to move around the menus. Shift + F10 is the same as right-clicking on a highlighted icon, file, or Internet browsers - Pressing F11 when you are working in Internet Explorer will open the window to full screen mode. All the tool bars disappears making it
possible to see more information on the screen. Pressing F11 when you are in full screen mode will toggle you back to your normal view. F12 Open a new document in Microsoft Word Open the Save as dialog box in Microsoft Word. Shortcut Keys
 and their Functions: Some commonly used computer short cut keys are documented below. Short-cut Keys and their Descriptions Alt + F: File menu options in current program. Alt + F: File menu options in current program. Alt + F: File menu options in current program.
Copy selected item. Ctrl + Ins: Copy selected item. Ctrl + V: Paste selected item. Ctrl + V: Paste selected item. Ctrl + End: Goes to beginning of document.
